e-WASTE

Take a wiser approach for its disposal

Sh. Raj Kumar Chauhan
Minister of Environment and Forest

E-waste is old Computers, TVs, Mobile Phones, Refrigerators, Radios, CDs, Floppies, any electrical or electronics appliance that has reached its end-of-life. Improper recycling and disposal of e-waste can result in dangerous health and environmental hazards.

The only way to keep the environment and yourself safe is to re-use e-waste in innovative ways

Use electronic products longer

Return used /obsolete electronic products to the manufacturer

Don't throw away electronic products. Pass them to friends
